

Industry-Leading Reporting

Real-time analytical insight has never been more critical for mortgage quality control.

ACES offers powerful tools to analyze and visualize your data. Gain competitive advantage with Advanced and Standard reporting features, and position yourself for proactive problem resolution.

KEY BENEFITS

- Create multi-dimensional analysis
- Customize any report to your specific requirements
- Report to senior management, regulatory agencies and the GSEs with ease

Control Risk Mitigation, Defects & Non-Compliance

Understand your quality... by analyzing it.

- Expose risk factors, credit underwriting defects and compliance discrepancy trends
- Keep track of loan exceptions and audits
- Base systemic company-wide change on transparent data

✦ Advanced Reporting Capabilities

Seamlessly integrate ACES with Tableau software, a first for mortgage quality control audit technology.

Provide Actionable Insights

Experience geographic visibility with one-click analytical map creation.

Visualize reports such as:

- Disbursement of Loan Ratings by Fannie Mae Category and Sub-Category
- Calculated Loan Rating
- Disbursement of Exceptions
- and more

Easily Create Visual Analysis

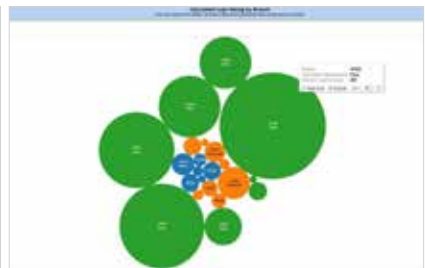

Enable any user to see or create impactful visual analysis within minutes

Provide actionable insight like never before
Access a wide variety of powerful visualizations such as bar graphs, heat maps, scatter plots and pie charts

Create and interact with reports through intuitive drag and drop

Present compelling data at your next internal or external meeting

Filter, sort, publish and discuss interactive data at any time

✦ Standard Reporting Capabilities

ARMCO's integration with SAP's Business Objects combines an industry-leading Business Intelligence reporting platform with our industry-leading QC platform.

Convenient Pre-Defined Reports

Benefit from dozens of pre-defined reports created from decades of interactions with customer such as:

- Individual Loan Summary
- Departmental Level Productivity
- Gross v. Net Defects
- Error Responsibility (Area of Responsibility – AOR)

Reporting the Way You Want It

Create custom reports in any desired format off of any field in the database

Generate unique reports with charts, graphs and narrative sections

Save valuable time and copy reports for re-use in other audit areas

Modify on-the-fly to suit your organizational needs
